

Accessibility

Easily accessible through app store and even playstore on android

You can either download the app or use the features through its website.

It is available on windows too.

Security

Personal info is secure

You will be notified of any devices other than the primary one trying to log in to your account.

Automatically restricts an unauthorized users from gaining access to your account unless you let them in.

Design

It's really colorful and beautifully designed

You can customize the design of the app or website to your own liking

Because of how well designed it is, the app or the website is easy to understand and use.

Potential problems

There may be minor bugs that may prevent your transaction and registration from being complete.

If such issues arise, you can contact one of the services to complete your transaction and registration.

Features

Online registration of the tickets is possible

Tickets for many different games will be available

Phone numbers of different services are available in the app/website.

There is a section where users can give their feedback, thoughts, and opinions on the app, so that we can use that information to improve the app.

If users don't feel like writing out their feedback, we'll ask them to fill out a survey for a chance to win a prize.

Any form of transaction (including zelle and cash app) is possible.

Future developments

In the near future, we will not only try selling college sports tickets, but also professional sports ticket.

We will also try to sell movie tickets too.

You will also have the ability to follow people and even make friends on the app.
